

SKIMPAC

Free-Product Recovery Made Easy! (No more hand bailing)

Skim free-product with the use of solar power

SKIMPAC

A self contained, stand-alone product recovery system which can be installed in any monitoring or recovery well.

No Power, No Air, No Permits, No Trenching

SSI's **SkimPac** solar skimmer is an ideal application for remote locations and for those that need immediate response.

- No electricity
- No air supply
- No groundwater recovery
- Easy deployment
- The unit is compact (2 x 2 foot print) and light
- Easy to assemble and setup
- Up and running in under one hour
- Product recovery is immediate!
- Product recovery down to a sheen

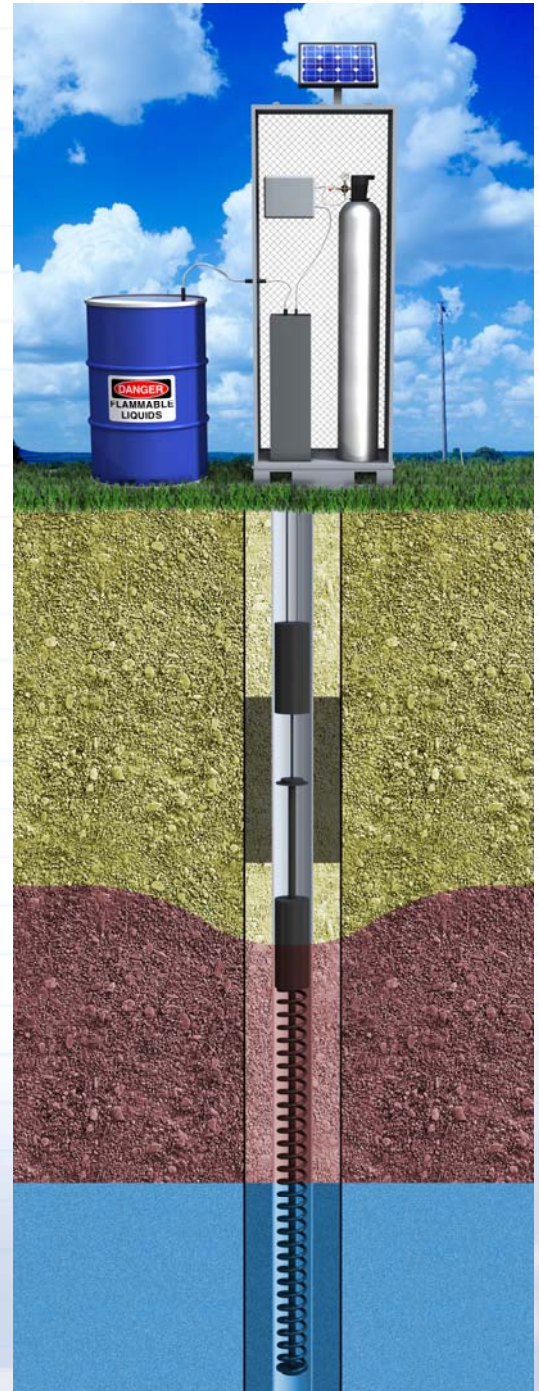

SKIMPAC Facts

- High performance product recovery system (up to 160 GPD)
- The most effective way of removing LNAP and DNAPL
- The use of inert gas (N₂) eliminates any down time that is typically associated with air moisture problems.

SKIMPAC Applications

- Fresh gasoline
- Weathered diesel or fouled fuel conditions
- DNAPL recovery
- Product recovery in up to 36" of groundwater fluctuation
